The Maternity and Newborn Care Center

Helping each new life get off to a healthy start

Parents-to-be from all over the Tel Aviv region and Israel entrust their most precious treasures to the hands of Lis Maternity & Women’s Hospital’s labor and delivery specialists. Mothers who are at risk of miscarrying rely on gifted Medical Center obstetricians to help bring their babies to term with a viable chance of survival.

The new center: A remedy for natural growing pains

The new Maternity and Newborn Care Center arose from the need to meet increasing patient demand for our world-class services in labor and delivery, postpartum and high-risk pregnancy. For expectant parents, the center’s calm, welcoming, ultra-modern environment sets the stage for their entire delivery experience. As the center meets new expectations in standards of care, its goal is to provide families with the privacy they need to bond, as well as stress-reducing comforts to ease them into parenthood.

Protecting “priceless possessions”

In a city under looming threat of military attack, new mothers and fathers will rest assured that their newborn is out of harm’s way in the new neonatal emergency shelter. The Maternity and Newborn Care Center makes a commitment to mothers and fathers to give their babies a warm, loving start on their life’s journey.
